This is a marketing communication. This is not a contractually binding document, and its issuance is not mandated under any law or regulation of the European Union. This marketing communication does not include sufficient detail to enable the recipient to make an informed decision. Please refer to the Prospectus of the UCITS and to the KIID before making any final investment decisions.

## Objective and investment policy

The Impax Environmental Leaders (Ireland) Fund seeks to achieve sustainable, above market returns over the longer term (5+ years) by investing globally in companies active in the growing Resource Efficiency and Environmental markets. These markets address a number of long term macro-economic themes: growing populations, rising living standards, increasing urbanisation, rising consumption and depletion of limited natural resources. Investments are made in companies which have >20% of their underlying revenue generated by sales of environmental products or services in the energy efficiency, renewable energy, water, waste and sustainable food and agriculture markets. The investment decision process is based on multi-year trends including impacts arising from population changes, infrastructure issues, scarcity of resources and environmental issues. The Fund aims to invest in companies that display positive environmental, social and governance attributes.

The Fund has been classified as an Article 9 financial product for the purposes of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ("SFDR").

The Fund is actively managed and is not managed in reference to a benchmark.

## Fund specific risks

**Market risk:** The Fund's investments are subject to market fluctuations, so they can fall as well as rise in value.

**Currency risk:** Fluctuation in exchange rates may reduce investment gains or income and increase losses. Additional risk should be considered where the fund's base currency differs from the currency of your own investments.

**Emerging market risk:** The Fund may invest in newly established companies whose future is dependent on (i) widespread adoption of their products and services and (ii) timely implementation of anticipated changes in local governmental policies; investments in companies in emerging markets or less developed countries in the region may face more political, economic or structural challenges than developed countries, putting your money at greater risk, and may be negatively impacted by changes in government policies, changes in taxation, restrictions in foreign investment and the movement of money from one country to another, currency fluctuations and other developments in the laws and regulations of countries in which investments may be made.

**Liquidity risk:** Substantial selling by shareholders may necessitate the Investment Manager having to sell investments, incurring losses that would otherwise not have arisen.

**Investment risk:** The Fund may invest in Participatory Notes (an instrument that is similar to owning shares) which may expose investors to losses where the issuer of the Participatory Note becomes insolvent or defaults on their obligations.

**Sustainability risk:** Sustainability risks are environmental, social and governance events or conditions whose occurrence could have an actual or potential material negative impact on the value of the Fund and all known types of risk of the Fund.

## General risks

**Market fluctuations:** Potential investors should note that the investments of each Fund are subject to market fluctuations andthat there can be no assurance that any appreciation in value will occur. The value of investments and the income from them, and therefore the value of, and income from the Shares, can go down aswell as up and an investor may not get back the amount invested.

**Cross liability between funds:** The Company is established as a segregated portfolio company. As a matter of Irish law, the assets of one Fund will not be available to satisfy the liabilities of another. However, the Company is a single legal entity which may operate or have assets held on its behalf or be subject to claims in other jurisdictions which may not necessarily recognise such segregation. There is no guarantee that the courts of any jurisdiction outside Ireland will respect the limitations on liability associated with segregated portfolio companies nor is there any guarantee that the creditors of one Fund will not seek to enforce such Fund's obligations against another Fund.

**Expenses charged to capital:** Shareholders should note that all or part of expenses may be charged to the capital of a Fund in order to enhance distribution levels. This will have the effect of lowering the capital value of an investment in a Fund.

**Substantial repurchases:** Substantial repurchases by Shareholders may necessitate liquidation of investments. It is possible that losses may be incurred due to such liquidations that might otherwise not have arisen.

**Temporary suspension:** Investors are reminded that in certain circumstances their right to redeem or convert Shares may be temporarily suspended.

**Dependence on the principals of the investment manager:** The principals of the Investment Manager have authority to control the investment management of the Company. If, for any reason, the Investment Manager were to lose the services of these individuals, the Company might be adversely affected.

**Performance fee:** Any Performance Fee paid to the Investment Manager may create an incentive for the Investment Manager to cause a Fund to make investments that are riskier or more speculative than would be the case if there was no Performance Fee in place.

**Political or regulatory risks:** The value of a Fund's assets may be affected by uncertainties such as international political developments, changes in government policies, changes in taxation, restrictions in foreign investment and currency repatriation, currency fluctuations and other developments in the laws and regulations of countries in which investments may be made.

**Controlling shareholder:** There is no restriction on the percentage of the Company's Shares that may be owned by one person or a number of connected persons. It is possible, therefore, that one person, including a person or entity related to the Manager or the Investment Manager, may obtain control of the Company or of a Fund.
