Please refer to the Prospectus of the UCITS and to the KIID before making any final investment decisions.

Objective and investment policy

Impax Global Social Leaders Fund (the "Fund") seeks to generate long term (5+ years) capital growth, through an actively managed portfolio of equities from issuers across the global equity markets. The Fund aims to enable investors to benefit from a diversified portfolio of companies that provide products and services benefitting society. The Fund pursues its objectives through a classification system developed in-house, which seeks to identify companies providing products or services that seeks to address long-term societal secular trends such as ageing populations, rising middle class in emerging markets, increased incidence of chronic disease, urbanization, and financial inclusivity. The classification defines the investable universe for the Fund by identifying companies which achieve 20% or more of their underlying revenue by providing products and services to improve quality of life, broaden economic participation, and meet basic needs.

The Fund has been classified as an Article 9 financial product for the purposes of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ("SFDR").

The Fund is actively managed and is not managed in reference to a benchmark.

Fund specific risks

Market risk: The Fund's investments are subject to market fluctuations, so they can fall as well as rise in value. There can be no assurance that any appreciation in value will occur. The value of investments and the income from them, and therefore the value of, and income from the Shares, can go down as well as up and an investor may not get back the amount invested.

Currency risk: Fluctuation in exchange rates may reduce investment gains or income and increase losses. Additional risk should be considered where the fund's base currency differs from the currency of your own investments.

Emerging market risk: The Fund may invest in newly established companies whose future is dependent on (i) widespread adoption of their products and services and (ii) timely implementation of anticipated changes in local governmental policies; investments in companies in emerging markets or less developed countries in the region may face more political, economic or structural challenges than developed countries, putting your money at greater risk, and may be negatively impacted by changes in government policies, changes in taxation, restrictions in foreign investment and the movement of money from one country to another, currency fluctuations and other developments in the laws and regulations of countries in which investments may be made.

Liquidity risk: Substantial selling by shareholders may necessitate the Investment Manager having to sell investments, incurring losses that would otherwise not have arisen.

Investment risk: The Fund may invest in Participatory Notes (an instrument that is similar to owning shares) which may expose investors to losses where the issuer of the Participatory Note becomes insolvent or defaults on their obligations.

Derivatives Risk: The Fund may employ warrants and convertible bonds in order to facilitate the enhancement of investment returns which may create exposure to market risk, liquidity risk, and legal risks. These derivative positions may be executed either on a recognised exchange, over the counter

or on a multilateral trading facility which may lead to risk of counterparty or settlement default.

Political and Social Risks: The value of the Fund's assets may be affected by political, legal, economic and fiscal uncertainties. Risks related to social issues can include but are not limited to labour rights, community relations and tensions arising from ethnic, religious and social divisions which may in turn adversely impact the profitability and return profile of relevant assets.

Concentration Risk: Significant problems can arise which materially affect a particular sector or geographical location or returns from a sector may trail returns from the overall stock market. Because the Fund may take significant positions in one or more specific sectors or geographical location, the Fund's performance could be affected by, among other things, government regulation, world events and economic conditions, insurance costs, and labour relations issues.

Government Policy Risk: Risks around board independence, ownership & control, or audit & tax management. These risks can impact an issuer's operational effectiveness and resilience as well as its public perception, and reputation affecting its profitability and in turn, its capital growth, and ultimately impacting the value of holdings in the Fund.

Interest Rate Risk: The valuation of the assets and therefore the share prices of the companies that own them may be sensitive to expected long term cash flow profiles and the discount rates applied when valuing these cash flows. Changes in long term interest rates may impact asset valuations, with such valuations likely to be adversely impacted by rising market interest rates. Rising interest rates may in addition adversely impact the cost of debt financing and cash flow from these assets.

Custodial Risk: As the Fund may invest in markets where custodial and/or settlement systems are not fully developed, the assets of the Fund which are traded in such markets and which have been entrusted to sub-custodians, in circumstances where the use of such sub-custodians is necessary, may be exposed to risk in circumstances whereby the Depositary would have no liability.

Impax Global Social Leaders Fund

Factsheet | 30 May 2025

General risks

- **Market fluctuations:** Potential investors should note that the investments of each Fund are subject to market fluctuations and that there can be no assurance that any appreciation in value will occur. The value of investments and the income from them, and therefore the value of, and income from the Shares, can go down as well as up and an investor may not get back the amount invested.
- **Cross liability between funds:** The Company is established as a segregated portfolio company. As a matter of Irish law, the assets of one Fund will not be available to satisfy the liabilities of another. However, the Company is a single legal entity which may operate or have assets held on its behalf or be subject to claims in other jurisdictions which may not necessarily recognise such segregation. There is no guarantee that the courts of any jurisdiction outside Ireland will respect the limitations on liability associated with segregated portfolio companies nor is there any guarantee that the creditors of one Fund will not seek to enforce such Fund's obligations against another Fund.
- **Expenses charged to capital:** Shareholders should note that all or part of expenses may be charged to the capital of a Fund in order to enhance distribution levels. This will have the effect of lowering the capital value of an investment in a Fund.
- **Substantial repurchases:** Substantial repurchases by Shareholders may necessitate liquidation of investments. It is possible that losses may be incurred due to such liquidations that might otherwise not have arisen.
- **Temporary suspension:** Investors are reminded that in certain circumstances their right to redeem or convert Shares may be temporarily suspended.
- **Dependence on the principals of the Investment Manager:** The principals of the Investment Manager have authority to control the investment management of the Company. If, for any reason, the Investment Manager were to lose the services of these individuals, the Company might be adversely affected.
- **Performance fee:** Any Performance Fee paid to the Investment Manager may create an incentive for the Investment Manager to cause a Fund to make investments that are riskier or more speculative than would be the case if there was no Performance Fee in place.
- **Political or regulatory risks:** The value of a Fund's assets may be affected by uncertainties such as international political developments, changes in government policies, changes in taxation, restrictions in foreign investment and currency repatriation, currency fluctuations and other developments in the laws and regulations of countries in which investments may be made.
- **Controlling shareholder:** There is no restriction on the percentage of the Company's Shares that may be owned by one person or a number of connected persons. It is possible, therefore, that one person, including a person or entity related to the Manager or the Investment Manager, may obtain control of the Company or of a Fund.

Important information

This is marketing material. Full details of the objectives, investment policies and risks are located in the prospectus, which is available with the key investor information documents (KIID) and/or key information document (KID) before making any final investment decision.

This document has been issued by Impax Asset Management Ireland Limited which is authorised and regulated by the Central Bank of Ireland and which is the UCITS management company (the "Management Company") of Impax Funds (Ireland) Plc (the "Fund(s)"). Past performance does not predict future returns. Information on past performance refers to the past and past performance is not a reliable indication of future performance. The value of investments may go down as well as up and is not guaranteed. Changes in rates of exchange may cause the value of investments to fluctuate. The annual investment management charge and other charges are generally deducted from income, although a portion may be deducted from capital of the Fund. Where charges are deducted from capital, the potential for capital growth will be reduced. It is important to choose a fund that does not exceed the risk level you are prepared to accept.
