

## Impax Asset Management Group plc – Q3 AUM update

London, 6 July 2016 - Impax Asset Management Group plc ("Impax" or the "Company"), the AIM quoted investment manager focused on environmental markets and related resource efficiency sectors, today provides a quarterly update of its assets under discretionary and advisory management ("AUM").

On 30 June 2016 AUM was ca. £4.0 billion, which was 13% higher than AUM at the start of the quarter on 1 April 2016 and 42% more than AUM at the start of Impax's current financial year on 1 October 2015.

During the most recent quarter, the Company received net inflows of £112 million, predominantly from Continental European investors and an initial allocation from a new North American client.

Ian Simm, Chief Executive, commented:

"Impax continues to deliver strong investment performance by identifying attractively priced assets and companies operating across rapidly expanding environmental markets. This year we've recorded unprecedented levels of commitments from new clients and have a healthy pipeline of prospects.

The catalysts for change remain compelling and the underlying attractiveness of these markets should not be significantly impacted by Brexit. Furthermore, the successful asset realisations of our wind farm portfolios (disclosed within "Net inflows" in the below table) continue to demonstrate the value of our Private Equity investment strategy."

The table below sets out further details of the movements in the Company's AUM over the quarter ended 30 June 2016.

### **Notes to Editors - About Impax Asset Management**

Impax Asset Management is a leading investment firm, managing or advising on approximately £4.0 bn\* primarily for institutional clients through both listed and private equity strategies.

The Company's investments are based on the strong conviction that population dynamics, resource scarcity, inadequate infrastructure and environmental constraints will profoundly shape global markets, creating investment risks and opportunities. Impax expects that these trends, reflecting the transition towards a more sustainable global economy, will drive earnings growth for well-positioned companies. Impax's proprietary investment framework identifies and calibrates the rising risks and expanding opportunities from this transition, and guides the search for investments that will deliver long term outperformance.
