Overview

- **Established, expanding fund manager dedicated to the Environmental Sector**
 - ca. £1 billion funds under management/advisory
 - broad exposure across alternative energy, water treatment and waste management
- **Environmental Sector highly attractive for a specialist manager**
 - Large revenues (>US\$200bn p.a.) and growing rapidly (up to 30% p.a.)
 - Complex technology and regulation challenge generalist investors
- **Stable ownership**
 - BNP Paribas Investment Partners 27.9%
 - Dai'ichi IBJ Asset Management 4.7%
 - 30 staff owning ca. 25.7%
- **Growth plans based on:**
 - maintaining/building on investment track record
 - focusing on scaling up small number of innovative products
 - managing cost base

COMMENT

GREEN INVESTING | Despite economic conditions, investing in environmental businesses remains compelling

By Stephen Wilnot

The Impax Group was founded in 1994 as a fund-raiser for capital-hungry companies in the energy and waste sectors. It has since abandoned corporate finance in favour of asset management, private and public equity funds, venture capital and, most recently, a hedge fund.

Despite this business shift, Impax has stayed true to its roots in "environmental" finance. Its £1.2bn of assets under management are invested exclusively in alternative energy, water treatment or waste management.

But Ian Simm, chief executive, steers clear of the "socially responsible" label. "Our products are attractive to SRI investors without being positioned as SRI."

Instead, Mr Simm focuses on the potential for superior earnings growth, derived from a number of familiar environmental problems: the shortage of fossil fuels, unreliable power grids, air pollution, global climate change, contaminated water supplies, constraints on landfill space, and high commodity prices, which are driving up returns from recycling.

"It is inevitable that new industries and markets are growing in response to the policies that have been introduced to combat these negative influences," he says. He also cites the opportunity for diversification, as these trends are, to an extent, independent of the business cycle. Although Impax

Investment Week

15 December 2008

Credit crunch has not detracted from climate change

'...Impax says: "This is a sector quite heavily exposed to one of the most likely areas of early resurgence when the market does turn. And that is because the fiscal stimulus will be bias toward infrastructure spending, and in particular, clean infrastructure."...'

Roots sunk in the environment

FUND FOCUS
Impax steers clear of SRI label
£1.2bn invested in alternative sectors

By Stephen Wilnot

The Impax Group was founded in 1994 as a fund-raiser for capital-hungry companies in the energy and waste sectors. It has since abandoned corporate finance in favour of asset management, private and public equity funds, venture capital and, most recently, a hedge fund.

Despite this business shift, Impax has stayed true to its roots in "environmental" finance. Its £1.2bn of assets under management are invested exclusively in alternative energy, water treatment or waste management.

But Ian Simm, chief executive, steers clear of the "socially responsible" label. "Our products are attractive to SRI investors without being positioned as SRI."

Instead, Mr Simm focuses on the potential for superior earnings growth, derived from a number of familiar environmental problems: the shortage of fossil fuels, unreliable power grids, air pollution, global climate change, contaminated water supplies, constraints on landfill space, and high commodity prices, which are driving up returns from recycling.

"It is inevitable that new industries and markets are growing in response to the policies that have been introduced to combat these negative influences," he says. He also cites the opportunity for diversification, as these trends are, to an extent, independent of the business cycle. Although Impax

strives to remain as agnostic as possible on the "morality" of stocks, it avoids the grey areas of green investing. It does not, for example, invest in nuclear or gas-fired power companies.

"We try to be as honest as possible about defining the boundaries, so people don't lift up the bonnet and see something they were not expecting," says Mr Simm.

But Impax does run two SRI funds for ANS, the Dutch bank, and Pax World, the US mutual fund house. These are managed according to the house style, but with an additional screen that excludes up to 15 per cent of Impax's usual universe of stocks – some indication of the extent to which environmental and SRI investing may conflict.

Green stocks have been particularly bubble-prone this decade, leading some analysts to compare the sector with technology in the late 1990s. Mr Simm notes the recent fuel cell mania, for example. "Unprofitable companies were being valued as if 10 per cent of the world's cars were suddenly going to convert to fuel cell traction," he recalls.

He stresses that Impax's specialisation in the niche, paradoxically, offers protection against speculators. "We can avoid bubbles by switching money out of overvalued sub-sectors into less fashionable areas – so last year we were moving out of solar panels into energy efficiency and recycling."

One of the potential problems of focusing on a narrow universe like environmental

stocks is capacity. But Mr Simm rejects the idea Impax's model is limited. "The markets are growing at 20 per cent or more per annum, so as fast as we can raise money the opportunities to deploy it are growing," he says.

The company has, however, broadened its range of strategies to include an Environmental Leaders fund, which invests in larger, more diversified companies. This has expanded the universe to about £4,000bn. "In the medium to long term, we would expect the bulk of our growth to come from the all-cap fund," he says.

Unnatural trends in a green arena

'...In fact, I once spent a thrilling evening crunching the correlations of all the major green funds, of which the oldest and best established is an investment trust from Impax...'

Media coverage

The Daily Telegraph

14 February 2008

‘...Impax says the opportunities in the sector are growing rapidly. When Impax first started tracking clean-tech stocks in 1999 there were around 180 companies to watch. Today it is more like 600 – and they are much bigger...’

October 2008 issue

‘With financial markets feeling, and the global economy spluttering, fears are growing over the outlook for the environmental technology sector. Impax argues that even a worldwide slump is unlikely to completely reverse its fortunes.’

MoneyMarketing

21 February 2008

‘It has taken a while but the rest of the investment world seems to be catching up with Impax Asset Management. 10 years after it started investing in environmental technologies, many other fund managers have realised there is value in the sector...’

Impax's Environmental Hedge Fund – Key Features

Investment Strategy:	long/short equities
Expected Volatility:	<10%
Investment Universe:	800 stocks in the Environmental Sector Global coverage, European bias
Leverage Limits:	100% to 300% Gross
Market Exposure Limits:	-30% to +70% Net, Beta Adjusted
Pre IPO Side Pocket (optional):	20% of Net Asset Value (maximum)
Number of Positions:	40 to 80; Sweet Spot 60-65

Private Equity: Impax New Energy Investors LP

- INEI:** Private equity fund for the New Energy sector, largely renewables, in Western Europe & North America
- Status:** €125,000,000 from three closings (last August 2006)
- Objective:** Cash-to-cash IRR of 18-25% (net to investors)
- Strategy:** Equity-linked investments in project portfolio companies and projects with proven technology
- Investors:** Dexia Credit Local, USS, BA Pension Fund, West Midlands PF, CIS other pension funds/insurance companies
- Prospects:** 11 deals completed. Strong visibility on full investment by summer 2009
Fund II to be launched early 2009

Principal Distribution Partners

UK:	Collins Stewart (for IEM) plus direct sales
Continental Europe:	BNP Paribas Asset Management/Private Bank Scandinavian distributors
Asia:	BNP Paribas Asset Management/Private Bank DIAM (Japan)
North America:	Placement agent (US); partner identified for Canada

Employee Benefit Trust

Shares outstanding prior to EBT creation 92,722,053

Existing Scheme

- Period covered 3 years ending 30 September 2007
- Ordinary shares allotted to the EBT 18,250,000
- Ordinary shares sold by EBT to fund its purchase of ordinary shares 1,472,995
- Ordinary shares held by EBT at 30 September 2007 16,777,045

New Scheme

- Shareholder approval at EGM 31 January 2008
- Period covered 3 years ending 30 September 2010
+ 2 year vesting
- Authority to allot Ordinary shares to the EBT 18,250,000

Shares outstanding if all EBT shares awarded 127,749,098

Outlook

- Environmental sector drivers set to strengthen
 - growing urgency to address global warming
 - milestones for alternative energy policy to be passed during 2009
 - many other policy initiatives expected (e.g. water, waste)
- Sustained sector capex expected
- Mounting evidence that institutional investors are allocating to this area
- Short-term, economic uncertainty overshadowing catalysts for stock price momentum
- Weak IPO and debt markets enhance opportunities for private equity
- When positive sentiment returns, Impax's growth model is well placed
