

AUM fall hits results but investment returns strong

20 May 2026

In April, Impax reported AUM had fallen 14% over H126 to £22.3bn. This coincided with a period of very heavy outflows for equity funds generally, and for active and sustainable funds especially (p 3 & 4). So, the consequential hit to results is no surprise. Revenue fell 10% from the prior six-month period (H225) to £58.8m, and 23% y-o-y (H125: £76.5m). Adjusted operating profit fell 45% y-o-y to £11.3m (H125: £20.5m) and profit after tax 57% to £5.4m (H125: £12.5m). However, the balance sheet and cash position remain robust (net cash £46m, no debt).

Impax cut adjusted operating costs by 15% y-o-y and is taking further cost reduction measures to reduce the impact of the recent AUM fall. It will cut c. 30 roles (11% of headcount) in H2. It is also closing some subscale funds.

And growth prospects are starting to look a little brighter.

- In H1, redemptions were not widespread across the client base but driven by a small number of institutional investors. Impax has noted an **improving flow trend in its wholesale channel and from its largest distribution partner, BNP Paribas** (BNPP makes up c. 26% of revenue).
- Market conditions have turned more favourable for a number of strategies, especially Thematic strategies which make up 62% of AUM (p 6). **YTD, 70% of AUM outperformed benchmark (p 7 & 8), and investment outperformance such as this tends to lead net flows.**
- Investors are certainly deploying funds to active managers, albeit highly selectively (p 5). And with elevated geopolitical uncertainty, Impax's deep expertise in areas such as energy efficiency, energy security, renewable energy, critical infrastructure (incl. energy, water, and digital) and environmental risk, could make it a highly attractive manager for asset owners' capital.
- Additionally, new products such as the *Impax Global Sustainable Infrastructure ETF*, listed on NYSE Arca, and new capital raises for private markets strategies should contribute to growth.

While this is a difficult period for Impax, we are confident it can recover from this trough and thrive.

Fair value unchanged at 250p per share, far above share price

We make only small adjustments to our forecasts (p 13) and **our DCF valuation remains 250p / share**, more than twice the share price. We also highlight that **Impax's adj. PER is just 8.2** (see p 14), versus a peer group median of 12.0. These low ratings prevail despite Impax's cash and on-balance sheet investments (seeding of funds) making up 48% of current market capitalisation (and that is at the low point of the annual cash cycle due to dividend and annual bonus payments in H1).

Impax at a glance

History and structure

- Impax is a specialist asset manager, focused on the growth opportunities arising from the transition to a sustainable economy.
- Launched in 1998, it listed on AIM in 2001 and is still led by founder Ian Simm (CEO), who owns c. 7% of the business.
- It offers a range of listed equities strategies (87% of AUM), fixed income (10%), and private markets (3%) strategies. It is looking to grow fixed income as a % of AUM and has made two recent acquisitions in this space.
- It employs 269 people, the bulk of which are based in the UK and the US, with smaller offices in Ireland, Hong Kong, Japan, and Denmark.

Revenue by investment strategy

Heavy outflows continue for equity funds generally, and active funds especially

Market fund flow statistics from Calastone show that Impax's H126 was a period of heavy outflows from UK-domiciled equity funds. However, there was an encouraging uptick in April, although this was in a narrow group of funds with a US-bias. Calastone said: "UK investors jumped back into equity funds in April after a record 10-month stint of selling... They added a net £1.08bn to equity funds, making April 2026 the best month for inflows since April 2025. Investors were choosy. They only committed new capital to US equity and global equity funds (these are US-heavy), which saw inflows of £1.14bn and £1.33bn respectively. Every other category of equity funds saw outflows."

UK open-ended net fund flows by month, £bn

Source: Calastone Fund Flow Index, Chart reproduced with permission. Calastone measures orders from UK-based investors into funds domiciled in the UK. Note that this has nothing to do with where the underlying assets are invested – a UK-domiciled fund may invest in Japanese equities, Australian fixed income, a global portfolio of mixed assets, or just UK equities.

Sustainable equity funds have also seen outflows, but bond funds have attracted capital

In Europe, the largest sustainable fund market by far, Article 8 bond funds (Article 8 funds *promote* environmental and/or social characteristics) have consistently attracted capital in recent years (black bars in left chart below). With a growing fixed income offering, Impax is well positioned to capture its share of any continuation of this trend.

Meanwhile, Article 9 equity funds (Article 9 funds have sustainable investment as their explicit objective) have seen heavy outflows in recent quarters (orange bars in right chart below). This trend has certainly impacted Impax's net flows.

But it is worth highlighting that **the sustainable investing market in which Impax operates is still huge, estimated at c. €9trn in Europe alone** (excl. UK). In addition to this, Impax also operates in the UK, US, and APAC, which are smaller markets, but still significant.

Not a one-way street for passive, pockets of demand for active management

Mostly weak flows, but selective deployment to active strategies

- While the general environment for active managers' flows has been very weak, flows are certainly not a one-way street towards passive. There are pockets of activity where investors have been deploying capital to actively managed strategies. Areas which have seen net inflows include:
 - Technology equities, which naturally have a US bias, with Polar Capital a major beneficiary;
 - Systematic equities, with Jupiter (in the last few quarters) and Man Group (throughout 2025) benefiting;
 - Global equities, which again have a US bias, with Jupiter a beneficiary;
 - EM fixed income, with Ashmore enjoying strong flows in Q4-25.
- Looking forward, with a strong likelihood of prolonged geopolitical uncertainty and disruptions to energy markets in particular, it wouldn't surprise us to see investors seeking out active managers which are well positioned to navigate this environment.
- Impax's deep expertise in areas such as energy efficiency, energy security, renewable energy, critical infrastructure (including energy, water, and digital infrastructure) and environmental risk would surely put it high on any investors' radar.**
- We think it could become a highly attractive manager for asset owners' capital.
- Impax has said that it has a number of fixed income accounts in its pipeline that could convert in H2, and it is seeing particular interest from US investors in its US Small Cap strategy.

Listed-equity investment performance starts to outperform

Investment performance improved meaningfully from January onwards, with **70% of AUM outperforming generic indices** during the calendar year to the end of April. Impax's active thematic listed equities strategies (which account for 62% of total AUM) have benefitted from market broadening and our portfolio managers' stock selection.

Largest equity strategy performance versus benchmark (GBP, annualised, %) ¹

In line with market standards, the strategy returns are calculated including the dividends re-invested, net of withholding taxes and gross of management fees. Impax Asset Management claims compliance with Global Investment Performance Standards (GIPS)®. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organisation, nor does it warrant the accuracy or quality of the content contained herein. Further information on composite data is available on request. ²AUM as at 31 March 2026. ³A hybrid account is not included in the Total AUM of the Leaders strategy and the AUM of this account is £596m. ⁴MSCI indices are total net return (net dividend re-invested). See appendix for more detail on strategy performance.

Fixed income investment performance has been strong for some time now

In fixed income, Impax's relative and absolute performance has been positive, with relatively consistent outperformance versus benchmarks over a number of years.

Largest fixed income strategy performance versus benchmark (GBP, annualised, %) ¹

Source: Impax. 1. 'CYTD': Year-to-date as at 30 April 2026. In line with market standards, the strategy returns are calculated including the dividends re-invested, net of withholding taxes and gross of management fees. Impax Asset Management claims compliance with Global Investment Performance Standards (GIPS)®. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organisation, nor does it warrant the accuracy or quality of the content contained herein. Further information on composite data is available on request. 2. AUM as at 31 March 2026. 3 The ICE BofA Global High Yield Index tracks the performance of below investment grade corporate debt of issuers domiciled in countries having an investment grade foreign currency long-term debt rating (based on an average of Moody's, S&P and Fitch). 4 Bloomberg Barclays US Aggregate Bond Index is a broad-based index, maintained by Bloomberg L.P. often used to represent investment grade bonds being traded in United States. 5 The ICE BofAML US High Yield BB-B (Constrained 2%) index ("Benchmark") tracks the performance of BB- and B-rated fixed income securities publicly issued in the major domestic or eurobond markets, with total index allocation to an individual issuer limited to 2%. See appendix for more detail on strategy performance. 6 The JP Morgan CEMBI Broad Diversified Index tracks the performance of US dollar-denominated bonds issued by emerging market corporate entities. The diversification methodology limits the weights of the larger index countries by only including a specified portion of those countries' eligible face amount outstanding, thus reducing single issuer concentration and providing a more even distribution of weights.

Analysis of H126 financials

AUM fall drives revenue fall

Sharp revenue fall y-o-y, less stark compared to H225

- Year on year H126 to H125 comparisons are stark. This is because during part of H125 AUM levels were substantially higher. These fell sharply with the loss of two SJP accounts totalling c. £6.2bn (see top chart). H126 revenue (£58.8m) was 23% lower than that of H125 (£76.5m).
- While AUM also fell compared to the immediately prior half-year (H225), the half-on-half revenue fall was not nearly so dramatic, down 10% (H126: £58.8; H225: £65.4). This was primarily due to an average AUM fall from c.£25.9bn in H225 to c. £24.2bn in H126, impacted primarily by the loss of a small number of institutional accounts.
- Average fee margin for the period was 47.9bps.
- We expect a small increase in AUM over H2, but given the low starting point, average AUM for H2 is expected to be lower than H1, and we forecast full-year FY26 revenue to be c. £110m, picking up to c. £112m in FY27.

AUM (£bn) profile

Adjusted income statement

Operating costs cut by 15% to minimise impact of AUM and revenue fall

- In addition to statutory accounts, Impax reports *adjusted operating profit*, which eliminates some volatile and non-cash costs and allows for a clearer view of the underlying performance of the business. Excluded costs are amortisation of intangible assets arising from acquisitions; charges in respect of acquisition-related incentive schemes; mark-to-market effects of NIC payable on share awards; and foreign exchange gains and losses.
- The remaining **adjusted operating costs decreased by 15% y-o-y from £55.9m in H125 to £47.5m in H126.**
- This fall was driven by an efficiency program which reduced **headcount by 9%** from 296 on 31 Mar 25 to 269 on 31 Mar 26, and making greater use of technology and automation.
- Headcount is set to reduce by another c. 30 roles, and a number of sub-scale funds are to close.**
- We forecast a 12% y-o-y reduction of adjusted operating costs in FY26 over FY25** (this is also dependant on AUM growth and the link to staff variable costs).
- Adjusted operating profit fell 45% from £20.5m in H125 to £11.3m in H126, with adjusted operating margin falling from 26.8% to 19.2%.

'Adjusted operating' income statement, £m & key cost changes

	H126	H125	Change
Revenue	58.8	76.5	(23%)
Staff costs	(30.4)	(37.1)	(18%)
Non-staff costs*	(17.1)	(18.9)	(10%)
(*includes: IT & communications, direct fund expenses, professional fees, premises and other expenses)			
Total adjusted operating costs	(47.5)	(55.9)	(14%)
Adjusted operating profit	11.3	20.5	(36%)
Adjusted Operating Margin	19.2%	26.8%	
Key changes to cost base:			
Total number of employees (period end)	269	296	(9%)
Fixed staff cost incr./decr. from prior year	(1.2)		
Variable staff cost incr./decr. from prior year	(1.2)		
Non-staff cost increase from prior year	(1.4)		
Variable staff cost/bonus policy			
The Company's policy is to pay salaries and benefits that are broadly in line with market median levels and, under normal circumstances, to award a total variable performance-related remuneration amount ("the Bonus Pool") of up to 45% of adjusted operating profit.			

Source: Company. Totals may not add due to rounding.

Statutory Income statement

AUM fall has significant impact on revenue and profits

- The main differences in costs between adjusted operating profit and statutory operating profit are:
 - One-off redundancy and restructuring costs of £2.5m
 - Amortisation of intangibles (management contracts arising from the previous Impax NH acquisition in the US and the Jul 24 acquisition of Impax Denmark (Absalon): £1.4m (H125: £1.3m).
 - Exceptional costs related to the Impax Denmark and Sky Harbor acquisitions, which were £0.2m (H125: £0.4).
 - Acquisition equity incentive charges of £0.10m (H125: £0.07).
 - Mark to market changes on equity awards which were £0.3m (H125: -£0.6m).
- In turn, IFRS operating profit decreased 58% from £17.6m in H125 to £7.4m.
- Finance income (mostly interest income) was £1.1m (H125: £1.7m), while finance costs were £0.3m (mostly fair value losses and interest on lease liabilities).
- PBT was down 56% from £18.6m in H125 to £8.2m and PAT down 57% from £12.5m to £5.4m, with an effective tax rate of 34.1% due to some non-deductible expenses.
- Basic EPS was down 55% to 4.4p and diluted EPS also fell 55% to 4.4p.

Bridge from adjusted to IFRS income statement, £m

	H126	H125

Balance sheet and cash flow

Balance sheet solid, no debt, healthy capital surplus

- Impax maintains its strong balance sheet, with net assets down y-o-y to £106.2m from £116.6m. **It has no debt.**
- The group provides a capital resources breakdown (chart on right) that considers minimum regulatory cash. This shows a **capital surplus of £53.7m**, including seed investments (£17m), which can be utilised to pursue organic or acquisitive growth opportunities, buy shares for the employee benefit trust (to avoid dilution from share awards), and the like.

Source: Company

Cash position still very strong

- Cash generated from operating activities (after tax) was -£2.7m (H125: £3.6m).
- As expected, cash reserves declined during the period from £64.7m on 30 Sep 25 to £46.0m (these exclude 3rd-party interest on consolidated funds and therefore differ slightly from accounting 'net cash' which includes these funds).
- Note that end-H1 is usually the low-point of Impax's annual cash cycle due to the payment of the prior-year final dividend (£9.9m) and annual staff bonuses being paid during this period.

Updated forecasts

The main changes to our FY26 and FY27 forecasts are shown below. The most significant points being:

- **For FY26**
 - We have allowed for higher redundancy and restructuring costs than our previous forecast, with a knock-on effect of statutory profits being lower than forecast.
- **For FY27**
 - We reduce our AUM and revenue forecast downwards slightly.
 - We reduce operating costs to take into account further cost cuts.
 - Our profit forecasts remain largely unchanged.

Impax looking undervalued on fundamentals and when compared to peers

Fundamental valuation of 250p per share: PE 8.2* v peer median 12.0

Our fundamental valuation of Impax uses a discounted cash flow methodology based on the following primary assumptions:

- Over a 5-year explicit forecast period:
 - AUM returns to growth in FY27, driven by a return to positive net flows, with a CAGR of 10% between FY27 and FY30 (including an assumed investment return of 5% per annum).
 - Revenue grows at a CAGR of 8% between FY27 and FY30, lower than AUM because we have assumed some price erosion over time due to competitive pressures and a greater focus on fixed income with a lower revenue yield.
 - Adjusted operating margins initially fall to c. 14% in FY26 before recovering to c. 25% in FY30, driven by a return to AUM growth and as the current round of cost cuts benefit margins in future years.
 - The absolute value of PAT falls to c. £8m in FY26 (hit by significant redundancy and restructuring costs), recovering to c.£26m in FY30.
- The business is acquired at a PER of 15 after year 5 (the terminal value in our DCF calculation), which we again believe to be a conservative assumption.
- All future cash flows are discounted at a rate of 13%.

This methodology indicates a fundamental valuation of 250p, more than twice the current share price.

- *We also highlight that Impax's PER is 8.2, compared to a peer group median of 12.0** (NB we have adjusted this PER to remove the effect of the £2.5m redundancy and restructuring charge. It would be 9.8 leaving this charge in). Given its niche strategic positioning, still-solid profit margins, and strong balance sheet, we see this discount as excessive.

Equity Development Limited is regulated by the Financial Conduct Authority

Disclaimer

Equity Development Limited ('ED') is retained to act as financial adviser for its corporate clients, some or all of whom may now or in the future have an interest in the contents of this document. ED produces and distributes research for these corporate clients to persons who are not clients of ED. In the preparation of this report ED has taken professional efforts to ensure that the facts stated herein are clear, fair and not misleading, but makes no guarantee as to the accuracy or completeness of the information or opinions contained herein.

Any reader of this research should not act or rely on this document or any of its contents. This report is being provided by ED to provide background information about the subject of the research to relevant persons, as defined by the Financial Services and Markets Act 2000 (Financial Promotions) Order 2005. This document does not constitute, nor form part of, and should not be construed as, any offer for sale or purchase of (or solicitation of, or invitation to make any offer to buy or sell) any Securities (which may rise and fall in value). Nor shall it, or any part of it, form the basis of, or be relied on in connection with, any contract or commitment whatsoever.

Research produced and distributed by ED on its client companies is normally commissioned and paid for by those companies themselves ('issuer financed research') and as such is not deemed to be independent as defined by the FCA but is 'objective' in that the authors are stating their own opinions. This document is prepared for clients under UK law. In the UK, companies quoted on AIM are subject to lighter due diligence than shares quoted on the main market and are therefore more likely to carry a higher degree of risk than main market companies.

ED may in the future provide, or may have in the past provided, investment banking services to the subject of this report. ED, its directors or persons connected may at some time in the future have, or have had in the past, a material investment in the Company. ED, its affiliates, officers, directors and employees, will not be liable for any loss or damage arising from any use of this document to the maximum extent that the law permits.
